PROFESSIONAL SUMMARY

Detail-oriented and analytical professional holding a Higher National Diploma (HND) in Public Administration and Management, with practical expertise in data analysis, operational support, business reporting, and administration. Proficient in transforming raw datasets into actionable insights using Microsoft Excel, SQL, and Power BI. Experienced in end-to-end data processing, including cleaning, DAX modeling, interactive dashboard creation, and data storytelling. Recognized for strong problem-solving skills, rigorous attention to detail, clear technical communication, and the ability to adapt rapidly within fast-paced professional environments.

CORE SKILLS & COMPETENCIES

Data Analytics:	Data Cleaning, Data Visualization, Interactive Dashboard Creation, Data Storytelling, Business Reporting, Statistical Analysis
Tools & Technologies:	Microsoft Excel (Advanced), Power BI, SQL, DAX, Google Workspace, Canva
Administrative Support:	Operational Support, Inventory Management, Document Control, Logistics & Scheduling, Financial Reconciliation
Interpersonal Skills:	Structured Problem Solving, Technical Communication, Cross-Functional Teamwork, Attention to Detail

PROFESSIONAL EXPERIENCE

Store Keeper / Supervisor — <i>Maas Central Hotel, Rumuogba</i>	Feb 2025 – Present
- Administer, clean, and audit high-volume inventory datasets using advanced Excel tracking models to safeguard corporate asset integrity and maintain system accuracy. - Produce weekly operational and analytical reports for executive management, identifying key variance trends, optimizing resource allocation, and supporting strategic decision-making. - Oversee daily procurement of office supplies, document management systems, and record archiving to maintain a structured administrative infrastructure.	
Data Analytics Intern — <i>MicroTech Africa</i>	Jun 2026 – Aug 2026
- Executed data preparation, cleaning, modeling, and reporting tasks for real-world business datasets using Microsoft Excel, SQL, and Power BI. - Collaborated with cross-functional team members to interpret analytical requirements, document workflows, and present data-driven deliverables to stakeholders. - Applied practical problem-solving frameworks to build clear visuals, summaries, and actionable operational insights.	
Receptionist — <i>Nikky Suites and Hotel</i>	May 2021 – May 2022
- Reconciled daily front-office financial transactions, managed cash-flow logging, and modernized digital record-keeping procedures to optimize administrative workflow. - Coordinated internal logistics, handled scheduling conflicts, and managed departmental communications to ensure seamless operational support. - Welcomed visitors professionally while upholding organizational communication standards and safeguarding client relations.	

SELECTED PROJECTS

Amazon Sales Analysis & Interactive Power BI Dashboard

- Processed and structured e-commerce sales datasets. Developed DAX measures to evaluate pricing strategies, product rating distributions, and customer feedback trends in Power BI.

Hotel Booking Analysis Dashboard

- Modeled and analyzed booking patterns, cancellation rates, Average Daily Rate (ADR), and customer demographics to generate actionable hospitality industry insights.

Investment Preference Analysis

- Conducted exploratory analysis on investor demographics (age, gender) and financial objectives; engineered an interactive reporting dashboard highlighting portfolio preference distributions.

Election Results Analysis Dashboard

- Merged and standardized disparate election datasets to build an interactive dashboard enabling real-time geospatial and statistical analysis of voting outcomes.

BCG X Data Job Simulation (Forage)

- Analyzed operational and business performance data to formulate data-backed strategic recommendations.
